

**C&G ENVIRONMENTAL PROTECTION HOLDINGS LIMITED**

(Incorporated in Bermuda on 24 September 2004)

(Registration Number 35842)

(the “**Company**”)**C&G’s Huangshi Waste-to-Energy plant Clean Development Mechanism project has successfully been registered in the United Nations**

The Board of Directors of C&G Environmental Protection Holdings Limited ( “C&G” or the “Group”) is pleased to announce that its Huangshi Waste-to-Energy (“WTE”) plant (“Huangshi Plant”) located in Hubei Province was successfully registered as a clean development mechanism (“CDM”) project (Code 7853) by the United Nations.

Being approved as a CDM project by the United Nations allows Huangshi Plant to implement the sale of certified emission reduction (CER) credits. The CER credits, also known as carbon credits, each equivalent to one tonne of carbon dioxide, can be traded, sold, and used by industrialised countries to meet a part of their emission reduction targets under the Kyoto Protocol.

The Group’s CER credits will be permitted to transfer to three buyers in Finland with whom the Group has entered into agreement: Climate Opportunity Fund Ky, GreenStream Network Plc and Fine Post-2012 Carbon Fund ky, which are authorized by the Government of Finland up to 1,510,000 tons of carbon dioxide equivalent.

The successful registration of CDM project for Huangshi WTE Plant is not expected to have any material impact on the consolidated net tangible assets and earnings per share of the Group for the financial year ending December 31, 2013.
